Hey, I'm Ryan Grist, founder of Angle Studios,  
a SaaS Design and Tech Consultancy.

I'm excited you're reading this, as no doubt you have an idea  
for an app and you're looking to take action.

First things first, you need to nail your introduction so you can  
explain what your app does, who it's for and how it helps, in  
20 seconds – rather than around the houses in 20 minutes!

Trust me, you will engage more people and ooze confidence  
when talking about your brilliant app idea with a succinct intro.

Here is the Vision Intro™ course. I hope you find it really easy  
to follow. There is a video available if you need it.

If you would like us to create the Vision Intro™ for you,  
[please book it in](#) and we'll get started.

I'm sure you'll have your intro nailed in no time.

Let's do this!

A handwritten signature in black ink, appearing to read 'Ryan'.
